

Study Overview

City of Prince George
Parking Modernization Study

- The City of Prince George has initiated a Parking Modernization Study to review the current state of parking in the Downtown and Hospital Parking Zones.
- The study is reviewing the City's on-street and off-street (surface lots and parkades) parking to understand existing parking demand and assess future needs.
- The study will suggest improvements to the current parking system in the following areas:
 - Parking supply and design
 - Public safety
 - Accessibility
 - Payment and enforcement
 - Supporting infrastructure and maintenance
 - Other parking considerations (e.g., EV charging, bike parking)
